Objectives

The participant will be able to do the following upon successful completion of this activity:

1. Describe the three morphological layers of the skin
2. Perform skin lesions assessments noting anatomic distribution, color, morphology and configuration.
3. Define the term drug eruption. List three classes of medications that cause drug-induced rashes.
4. Interview a patient to uncover key data relating to a skin condition which will form the foundation for treatment evaluations, decisions and physician referrals (pharmacist)
5. Interact with customers to obtain information relating to the skin condition that can be used to answer questions about OTC products and/or passed on to the pharmacist for consultation. (pharmacy technician)

The Kentucky Pharmacy Education & Research Foundation is accredited by The Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

Universal Activity Number (UAN)
